P O R T F O L I O

INFORMED TRADES
https://carolinetwyman.github.io/Informed_Trades

A Web Application that uses New York Times and AlphaVantage APIs to help you find the latest information about Stocks of your choosing.

- Core responsibilities were finding the AlphaVantage API, using JavaScipt and jQuery to retrieve and append all data to the site. I also added the LocalStorage aspect for a Portfolio aspect.
- Languages: HTML5, CSS3, jQuery, JavaScript, JSON

RANDOM PASSWORD GENERATOR
https://carolinetwyman.github.io/PasswordGeneratorFinal/

A Web Application that uses JavaScript to generate a password based on customizable parameters.

- Languages: JavaScript, CSS3, HTML5

TIME BLOCKING APP
https://carolinetwyman.github.io/TimeBlockingApp/

A Web Application that allows you to plan your day down to the hour, with color coding to keep things interesting.

- Languages: HTML5, CSS3, JQuery, JavaScript
